THE DAILY NEWS

Newport:

SATURDAY APRIL 22, 1848/A

BY O. F. JACKSON, ST-THAMES ST

has the circulation of the DAILY NEWS is more than DOUBLE that of the Daily Heraid, and greater than the combined circulation of the Dally and Weekly Herald. As one proof of this fact, the list of Letters remaining in the Post-Office is advertised in the NEWS, as BY LAW REQUIRED.

Yesterday we received two copies of the North American, a paper published in the city of Mexico, through the politeness of Mr. Benjamin W. Coit, an officer in the U. S. Engineer corps. We make the following extract:

" The peace stock has nigne down somewhat, in consequence of rumore that the celebrated Guadalupe treaty is not to be ratified without some slight modifications.

It has been reported here, that it even stands a chance of being rejected in the Senate of the United States. Several strong articles have appeared against it in the American press, a specimen of which we gave a lew days ago from the N. O. Crercent.

With such a feeling abroad, and still growing, unless the treaty be hurried through the Seriate, there may be some through the Senate, there may difficulty still in making a peace."

The Dioramic, Pamoramic, and Automatonic exhibition to be seen at the town Hall, is really, worth the price charged for admission., Those who have never had the pleasure of making a trip up the majes. ue Hudson River, in a steamboat, may now do so not to a steamboat, nowever, but in imagination, while siting in the Town Hall, and gazing on a moving diorama of the noble river, logether with all its picturesque scenery. An exhibition will be given at 3 o'clock this afternoon, for the accomodation of schools, and another at 71 oclock this evening.

NEW YORK MORNING STAR. This is the name of a daily paper recently started in New York by Williams Brothers, which has attained its forty-sixth number. We have received two copies of it, in the colour science; and we shall be most happy to add it to our exchange list. We hope the Stor may continue to twinkle for many long years, yea, may, it become a fixed

Sier. Africa C. and O. Sapage she WASHINGTON, APRIL 20,- In the Executive session of the Senate yesterday, great excitement was produced by a statement that the Treaty obtained and published by the N. Y. Herald, had emenated from the Union office. A motion was made to send Nugenti: the reporter of the Herald, to the Penitentiary. The Whige voted against the motion A heated discussion followed. and the metion was finally rejected. It was then moved to discharge Nugent, and pending this motion the Senate adjourned.

HEAVY FORGERIES .- The Worcester papers announce that extensive forgeries said to have been prepetrated by Mr. Seba Carpenter, shoe manufacturer are to the amount of from 20 to 50,000 dollars, and the fraudulent transaction has been in progress for three years. Camenter is missing, and is said to have borne an irreproachable character heretofore.

ASTOUNDING INTRELIGENCE!-Mr. Editor:-I sae by your 'No. of to-day," it is stated in a letter from Rome that proposals are now under consideration by the Pope for abulishing celibracy of the clergy." Please add that " as wives and families would greatly augment the expense of supporting, it is equally under the Pope's consideration to obtain, by means of a yetfo-be-invented electric Telegraph and line of Ethereal Steam Balloons, under the direction of the Grand Mundane and Lunar Transportation Co., a constant supply of green cheese from the Moon, which, with an adequate quantity of "Soger's Soup for the poor," it is supposed will subsist these wives and families without much addition al expense to the poor, who are so very numerous in the Catholic Clurch.

Yours truly,

Newport, April 15, 1848.

(Correspondence of the News.) UNITED STATES HOTEL, Boston, April 19th, 1948

FRIEND JACKSON :-

I intended to have written you yesterday but really all my leisure moments have been occupied in perusing that delightfully fascinating work, entitled " Jane Eyra." Have your read it? The author is generally styled the " Grent Unknown! W ever he be) he surely deserves to be Knigh ted, for a more popular book has not been given to the world, since the teste for light reading become such a perfect mania. I beg you will get it and jenrich the News with copious extracts from lite interesting.

I wish I had something new or strange to tell you, but actually the entire city seems afflicted with energi; I do not hear of a single elopement, and indeed the "Police Gagette" is filled with matter quite foreign to what its name imports.

The French Revolution continues to be the theme which is regularly discussed over our dinner table, and additional zest is given to the subject by the sparkling wit of the few patriotic Frenchinen who grace our board.

Much diseatisfaction is being felt at the manner in which the Telegraph wires from this city to New York are conducted.-But little courtesy is extended to Editors in this city, and so much annoyance is constantly experienced by businessimen generally, that a new Telegraph Company is about to be formed and stock will be rapidly taken up.

The weather continues most glorious, and the grass on the Common is rapidly assuming its summer hue. I am told that the iron railing that encompasses this ground, was erected at a cost of a \$100,000; of this sum the city paid \$61,000; the hallance was procured by private subscrip-Lion.

Probably in less than two years the great project of supplying the entire city with pure water, will be accomplished. It is in contemplation to have a great pelebration on the completion of it, and it will indeed be a most fitting occasion tor, a general jubilee

Before I forget it, let me suggest to your Newport friends to give this Hotel, from the tem writing, a trial on their next visit to this city. I am confidentit will meet with their approbation in every respect In hasts...

Yours &c.

MECHANICS AND MANUFACTURERS. The adjourned meeting which was a ppointed for Tuesday evening, 25th inst., is postponed to Wednesday evening, May 10th. The hourand place will be duly notified by the messenger. Per order of the Presd't, Apr 22. T. COGGESHALL Sec'y.

GALE. A disastrous gale has occurred on Lake Erie; it commexced on Monday and lasted till Wednesday. Fitteen vessels were ashore near Sandusky. Steamor Oregon was nearly wrecked.

83-John Nugent, the imprisoned Wash ington correspondent of the New York Herald has commenced a suit for libel against the publisher of the New York Mirror.

CONGRESSIONAL .- In the Senate, on Wednesday, Mr. Hale gave notice that the next day should introduce a bill in regard to riots rendered in detence of his country. and unlawful assemblages in the District of . Columbia.

lowing the New York and New Orleans line of steamers to touch at Havana and take on passengers, was taken up, read a third time, and passed.

The bill granting judicial powers to Amer fcan consule in China and Turkey was made the special order for Monday next.

On motion of Mr Badger the Senate went into executive session.

House.-The contested election case of Monroe and Jackson, of New York was taken up, when.

Mr, Jenkins offered a resolution affirming the right of Mr. Jackson to the sent.

Meers, Monroe and Jackson both spok in favor of their respective claims.

Mr. Jensins' Amendment giving the seat to Jackson, was rejected. The resolution of the majority of the committee that Jackson was not entitled to the seat was then adepted by the following vote; 103 to 93. Another resolution of the committee, that Monroe is entitled to the seat, was rejected.

61 to 104. The House then declared the Sixth Congressiant District of New York racuni, and adjourned.

FROM WASHINGSON. Apr 20. A meb of 2000 persons assimbled in front off the patent office last evening, and appointed a committee to wait on the publishers of the New Ern, and request the removal of that establishment. The committee reported that the publishers refused to comply. The mob resolved to remove the establishment at ten o'clock to day, and pay dameproject has been abandoned, and but few persons were collected in the neighborhood of the office, all was quiet. The propriedisconnection with the recent elopement of the slaves, and their determination to do or say hothing unlawful. Fears of a mob to-night are entertained.

The Antical Benefil Life Insurance Company is authorized by its charter to make all and every Insurance appertaining to or connected with Life risks; of whatsoever kind or nature, and will grant

risks, of whatsoever kind of nature, and will grant annuities and make endowments, as by the Act of Incorporation, passed the 30th January, 1845.

The Directors of this Company, deeply impressed with the very great useful, and growing importance to the community at large, of Life finantance, would call the attention of the public to the following observations and principles, as intended to evolute for the public to the following observations and principles, as intended. to explain to them its peculiar advantages, and the particular fontures of this valuable institution: It reacting to every risk appertaining to or connected with life; guarding and supporting infancy to old age, in all grades of professions and trades; orthogonality and trades; orthogonality and trades; orthogonality and trades; orthogonality and trades; phane, widows and their chikiren, by a small animust investment, on the principle of Mutual Ben-fits, arising from Mutual Insurance, being a self-protective society. In this there is no Money stock; the funds or capital arise from premiums paid in when persons make insurance, and these form the means to make payments on policies, grant loans, pay expenses, and yield profits. All persons insured become members, but are not liable beyond the amount of the premiums to be paid by them. . The books of the company are open to them, to see that the sums paid, or securities re-ceived, are deposited or invested according to the charter, and the nett profits, at fixed periods, are divided among them, as hereafter explained, table of figures, and the rules, are made and cal-culated with accuracy, after the experience and practice of old English companies, and all persons can see by them how much they have to pay, and the cains they will be likely to receive. This plan pa la ces of the Savings Bank and Mulual Inter-ests, affording the security of the one, and gain of the other, and is entirely benevolent in its operaa urovision for Married Women to insure the lives of their husbands for any amount, the premium of which shall not ex-ceal \$300 per annum, and is secured to them

ceast \$300 per annum, and is secured to them against any demands in law, of creditors.

The greatest portion of society, who by daily exertions of in sustry earn support, as artismar and mechanics, deriving livelihood from personal labor and skill, seldom resort to Life Insurance, in any numbers, for a future provision for their families, though to none would it be so important as to them, who, by sickness and death, may in a day, leave those nearest and dearest for the pin constitution. leave those nearest and dearest to them in poverty To men in mercantile pursuits and those in pro-Jessimual business of overy rank and class, or those who have uncertain or small incomes, and who are most numerous in wealth in the aggregate, and have it in their power to provide against the vicis-eitudes they are constantly exposed to, Life Insurance is also of the utino t importance; they, and those in lower circumstances, are often deterred from entering into contracts of insurance, as the al untages appear remote-being contingent on

death, or ability to pay the promiums.

To assist all such, this Midwal Henefit society so array to the payment of the premiums, and of teners it pay, of the same, as to chable all per-ture to be one, members, and enjoy its adventages will living; thus preferring themselves in life. and providing for their families of or their death; ar this way a short life may obtain, and leave to

What can better illustrate the wise disposition of the Supreme Being, in the varying term of huof in. Supreme issuing, in the varying term of human life, than the certainty of the general I use that regulate its duration, and the reflections that arms from the contemplation of these laws operating constantly upon the human rice? Life insurance then tests upon the simple fact, that every individual of the human race has, at the period of his birth, a certain term of existence, will live through, or what is tailed the mean dura-tion, or expectation of life at birth.

It is a question how such term of existence, or

mean duration, is found. This is done simply by taking the number of years that have been lived through by a p rty from birth to death, and also of 1000 others born at the same time, and dying at all ages from 1 to 100 years old-the number of years thus lived by each person is added into one sum and being divided by the number of persons the mean duration of the life of man is ascertained.

. If it were found on trial, that on taking the rerult of the lives of 1,000 or 10,000 individuals, and deducing the mean duration; and then going through t e same process with like numbers, and the mean duration of the latter differed widely from the former, it would be to no surgice to fol-low out experiments: but this is not the sact, and in nothing is the uniformity of the general laws of nature more powerfully exemplified that he regue lating the period of laman existence. The result of experience is constant, that two tences of individuals, each of 1000, fixing in the same country, and of similar occupations, have each a period of mean duration, which differs only a triffe from that of the other body. Apply this to insurance on life in the same body of persons; they pay a small sum or premium, annually, and the office, or Company, agrees to pay them annually a profit, and a certain sum at the death of each; as ample, the average expectancy of life is found by experience, to be of a person in health of 25 years, 38 years more; and of 40 years 28 years longer; then by the tables of rates, the first has to pay 520 40-100 a year during his life, to secure, \$1000 to be paid to his wife or children after his death; the second pays \$32, to insure the same; then taking the gain of interest, and other items, that make up the profits on Munal Benefits, it is almost certain the amount of \$1000 insured will be much increased, when in the end it is to be paid to his heirs, all which is firmly established by the facts of experience. Life Insurance, therefore, on Mutual Benefits, is not a fictitious scheme to draw people into, for money-making purposes. Such an idea, if it exists, is most incorrect, and

dissolved at once by the very fact that this is a utual Benefit Company, and consequently any person taking out a policy, becom a a member by a small annu I payment, and has a joint interest Founded on scientific principles, exemplified by experience, its real services then to all classes of persons, who are dependent on certain incomes, or salaries, professions, inschanical skill, or daily labor cannot be denied; and it has proved essentially beneficial to the families of such in even of death, and is therefore an institution ranking among the nublest works of benevolence in the

Such being the equitable and beneficial princiles on which Mutual Life Insurance is established, it presents a most suitable and favorable a man, who, for the gratification of his affections, Aug. 1847

hive in the cap les mant of them valued insuing a said in more of the comments his life may throw them into a state of destitution. The neglect, then for such a chean a U coltain rovision, in green improvidency; for this not provision, is green impropicing in 107 the soulier to ment's absolute (duty, to provide while he lives the duty) becaut for his chamby, that it is a least leaving them to suffer pentiless unsery in this exert of his death. It is them to lighture as well as not's distoy, to be easily tracologished by weekly, induly) or yearly extrings—and this lafe, in wrance of it may the things, is the protection against such dreadful ovile? The observations a all explanations above made

on the principles of Life institution generally and particularly the great and very superior allvantages bahibbed to the public by insuring in this muni Deserte Company; the oredit which policies will give to men in trade, the gain it may be to all classes in their business vocations, and the

luty of all to provide for their families, should induce every person to give this subject a careful consideration remembering the injunction of Scripture, that "if any provide not for his own, and especially for them of his own house, he hath denied the faith, and is worse than an inflided.
